Namma Space: Additional Links and Prototypes

Team ID: TM-12354C3F6F2 · **Institute:** Vellore Institute of Technology · Round 1, Techfest 2026-27, IIT Bombay
Members: Nilesh Kumar Srivastava, Ojas Ashish Kulkarni, Ujesha Sivaramakrishnan, Ashwin Dandotiya
Every link for the submission is collected here. All links are public and need no login or install.

1. Live web viewer

What	Link
Spatial Studio + Viewer (first-person walkthrough, point-of-interest search, A* route on a verified walkable grid)	https://namma-space-studio.vercel.app/?workspace=viewer
Gaussian splat viewer (streamed SOG/PLY model, first-person camera)	https://namma-space-pearl.vercel.app
Demonstration space	Synthetic Test Room Fixture (~106k splats, SOG format, badged `SYNTHETIC`)
Real capture reconstruction	*Blocked (BLK-001): 70 WhatsApp-compressed photos registered 57 % (below 60 % gate)*
Viewer smoke test (synthetic room, labelled SYNTHETIC)	Open the synthetic test room

Desktop (Chrome, Edge, Firefox, Safari) or phone. Needs WebGL2; no install or account. The splat streams with a progress bar on first load.

2. Controls guide

Action	Desktop	Touch (phone / tablet)
Start	Click **Enter space** (captures the mouse)	Tap **Enter space**
Look around	Move the mouse	Drag with one finger
Walk	`W` `A` `S` `D` or arrow keys	Hold two fingers to walk forward
Sprint	Hold `Shift`	–
Lower / raise eye height	`Q` / `E`	–
Release / resume the mouse	`Esc` / click the view	–

3. Demo video and walkthrough

What	Link
Round 1 demo video (4-5 min, narrated walkthrough of the deployed viewer, Capture Studio and the evidence behind the pipeline)	Namma_Space_Demo.mp4 (MP4, streams in the browser)
Round 1 demo walkthrough & SOP runbook	docs/DEMO_SCRIPT.md (Walkthrough Script & Procedure)

4. Source code and setup

What	Link

Repository, **Round 1 branch** `ashwinwork`	NAMMA-SPACE on GitHub, branch ashwinwork
Setup instructions (README: run the viewer, reconstruct a space)	README: setup and usage
Step-by-step Windows guide, from a fresh clone to a compressed splat	Windows setup and capture guide
Capture SOP	Capture SOP
Reconstruction pipeline (Python)	pipeline/ folder
Web viewer (React + three.js + Spark)	viewer/ folder
Sample data (synthetic test bundle)	tests/sample_data/ folder
Tested features, evidence & honest status	docs/SUBMISSION_ROUND1.md

5. Data

What	Link
Splat dataset (Hugging Face, public)	Ojas-CoderAI/namma-space-splats on Hugging Face
Synthetic test splat fixture	synthetic_room.ply (7.2 MB)
Real capture status	*No real splat trained; BLK-001 documented with repro steps in* `docs/CAPTURE_DAY.md`

6. Prototypes for later rounds

What	Link
Round 2 studio app: Capture Studio, PlayCanvas viewer with POI search and A* routing, Live Scan phone pairing (dev-only)	apps/studio/ folder
