Namma Space: Additional Links and Prototypes

Team ID: TM-12354C3F6F2 · **Institute:** Vellore Institute of Technology · Round 1, Techfest 2026-27, IIT Bombay
Members: Nilesh Kumar Srivastava, Ojas Ashish Kulkarni, Ujesha Sivaramakrishnan, **[ASHWIN_FULL_NAME]**
Every link for the submission is collected here. All links are public and need no login or install.

1. Live web viewer

What	Link
Digital twin walkthrough (real capture)	https://namma-space-pearl.vercel.app
Captured space	**[CAPTURED_SPACE_NAME]**, **[CAPTURE_DATE]**
Viewer smoke test (synthetic room, labelled SYNTHETIC, not a reconstruction)	Open the synthetic test room

Desktop (Chrome, Edge, Firefox, Safari) or phone. Needs WebGL2; no install or account. The splat streams with a progress bar on first load.

2. Controls guide

Action	Desktop	Touch (phone / tablet)
Start	Click **Enter space** (captures the mouse)	Tap **Enter space**
Look around	Move the mouse	Drag with one finger
Walk	`W` `A` `S` `D` or arrow keys	Hold two fingers to walk forward
Sprint	Hold `Shift`	–
Lower / raise eye height	`Q` / `E`	–
Release / resume the mouse	`Esc` / click the view	–

3. Demo video

What	Link
Round 1 demo (3–5 min): capture SOP, pipeline run, walkthrough	**[DEMO_VIDEO_URL]**

4. Source code and setup

What	Link
Repository, **Round 1 branch** `integration/round1`	NAMMA-SPACE on GitHub, branch integration/round1
Setup instructions (README: run the viewer, reconstruct a space)	README: setup and usage
Step-by-step Windows guide, from a fresh clone to a compressed splat	Windows setup and capture guide
Capture SOP	Capture SOP
Reconstruction pipeline (Python)	pipeline/ folder

Web viewer (React + three.js + Spark)	viewer/ folder
Sample data (test directory)	tests/sample_data/ folder
Tested features and known limitations	docs/STATUS.md

5. Data

What	Link
Splat dataset (Hugging Face, public)	Ojas-CoderAI/namma-space-splats on Hugging Face
Compressed splat loaded by the viewer	**[REAL_SPLAT_URL]**
Synthetic test splat (viewer smoke test only)	synthetic_room.ply (7.2 MB)

6. Prototypes for later rounds

What	Link
Round 2 studio app: Capture Studio, PlayCanvas viewer with POI search and A* routing, Live Scan phone pairing (dev-only)	apps/studio/ folder
